Harnessing environmental markets to reach net zero: Scaling new peaks

The sixth instalment of the premier annual environmental markets conference is coming back with a virtuoso virtual line-up, examining what the onset of the Paris Agreement era means for global climate ambition and how fast-rising carbon prices are becoming the key global commodity to watch.

Programme highlights

06 OCTOBER - EU ETS Day

- EU ETS expansion plans: shipping, transport and heating
- Brexit-busting: navigating the UK ETS and prospects for linking
- Market dynamics: power, gas and EUA supply/demand balance
- Investing in carbon markets
- Assault on industry - the impact of soaring carbon prices
- Countdown to 2050: the prospects for removals in compliance markets
- Low-carbon transport fuels
- Carbon analyst showdown

07 OCTOBER – Net Zero Day

- Glasgow calling: Prospects for COP26 and Article 6 carbon market negotiations
- Border breakdown: The EU's proposed carbon border adjustment mechanism
- Net zero best practice: credible corporate climate strategies
- How to ensure the voluntary carbon market can fulfil its potential to support the goals of the Paris Agreement.
- Trust and transparency: scaling the VCM
- NEW! Carbon analyst showdown: our forecaster head-to-head expands to the voluntary carbon markets
